

SOP Manual — Standalone Restaurant (India)

Oct 6, 2026 · @AP

Scope and how to use

This manual covers a single standalone restaurant of 40–150 covers in India: fine dining, casual dining or a café. Every SOP has a code (F0H-03 , B0H-05) and every department ends with a RACI. If the restaurant serves alcohol, also use the Bar and Pub manual.

Letter	Meaning
R	Responsible: does the work
A	Accountable: signs off; exactly one per task
C	Consulted before
I	Informed after

Adjusting by format.

Format	What changes
Fine dining	Sommelier and maître d' roles; course-by-course timing; reservation-led; tasting menus need allergen review per course
Casual dining	Section-based service; higher table turns; walk-ins plus reservations
Café	Counter ordering; barista replaces bartender; display food needs hot/cold holding logs

Owner: Restaurant Manager (RMGR); reviewed every 12 months or after any law change or serious incident.

Licences and legal rules

A standalone restaurant usually needs 10–14 licences before opening; the five that shape daily SOPs are FSSAI, GST at 5%, voluntary service charge, menu display, and fire safety. Confirm the list with your municipal corporation and state.

Licence / rule	What the SOPs must do	Owner
FSSAI licence	Basic registration up to ₹12 lakh turnover; State licence above that (FSSAI). Display the licence at the entrance; print the number on bills and menus. Thresholds are under review, so check the current figures before renewal.	Owner / RMGR
FoSTaC supervisor	At least one certified Food Safety Supervisor per 25 food handlers on licensed premises (FSSAI)	Head Chef
GST	Standalone restaurant service at 5% without input tax credit (Razorpay); composition scheme units cannot show GST on bills	Accountant
Service charge	Never added by default; shown as optional; no GST on it; no denial of service for refusing; none on takeaway (CCPA guidelines, upheld by Delhi HC on 28 Mar 2025) (South First)	RMGR
Menu display	Mandatory kcal, serving size and allergen display applies if you hold a Central licence or run 10+ outlets (Lexplosion); veg/non-veg marking is good practice for everyone	Head Chef
Eating house licence	Required from the police in some cities (for example Mumbai, Delhi)	Owner
Health / trade licence	Municipal corporation; renewed yearly in most cities	Owner
Fire NOC	From state fire services where seating or floor area exceeds the state threshold; extinguishers and exits regardless	Owner
Shops & Establishments	State registration; display working hours and weekly off	Owner
Liquor licence	State excise; see the Bar and Pub manual	Owner

Licence / rule	What the SOPs must do	Owner
Music	PPL / IPRS or other licensing for recorded or live music	RMGR
Signage, Legal Metrology, SPCB consent	Shop sign permit; stamped weights for any food sold by weight; pollution consent where the state requires it	Owner
Labour	Four Labour Codes in force from 21 Nov 2025; follow your state's rules (iPleaders)	Owner / HR
Data	DPDP duties (privacy notice, consent for marketing, breach response) bind from May 2027 (Uniquis)	RMGR

Keep a licence register at the manager's desk: licence, number, authority, expiry, renewal owner, and a reminder 90 days before expiry.

Team structure and roles

Two leaders run the restaurant under the owner: the Restaurant Manager for the dining room and business, and the Head Chef for the kitchen. Typical staffing for 80 covers is about 25–30 people.

Code	Role	Reports to	Core accountability
OWN	Owner / Partner	—	Licences, capital, final approvals
RMGR	Restaurant Manager	Owner	Revenue, guest experience, people, compliance register
AM	Assistant Manager / Shift Manager	RMGR	Running each shift, cash, complaints
HC	Head Chef	Owner	Menu, food safety, food cost, kitchen team
SC	Sous Chef	HC	Shift kitchen lead, ordering, prep lists
CDP	Chef de Partie / Line Cook	SC	Station mise en place and cooking
COM	Commis / Kitchen Helper	CDP	Prep, cleaning

Code	Role	Reports to	Core accountability
FSS	Food Safety Supervisor (FoSTaC)	HC	Logs, audits, hygiene training (often the SC)
HOST	Host / Hostess	AM	Reservations, waitlist, seating
CAP	Captain	AM	Section lead, order-taking, upselling
STW	Steward / Server	CAP	Table service
BAR	Bartender / Barista	AM	Beverages, bar stock
CSH	Cashier	AM	Billing, settlement, day-end
STK	Storekeeper / Purchase Executive	HC (food), RMGR (non-food)	Receiving, stores, issues
UTL	Utility / Dishwasher / Housekeeping	SC / AM	Pot wash, dish wash, cleaning
ACC	Accountant (often outsourced)	Owner	Books, GST, payroll, statutory dues
DEL	Delivery / Takeaway Coordinator	AM	Aggregator tablets, packing, handover

A day in the restaurant: opening to closing

A lunch-and-dinner restaurant follows the same 12 checkpoints every day; the shift manager signs each one in the daily log.

- 08:00 — Receiving window opens.** Storekeeper and sous chef check deliveries (BOH-02).
- 09:00 — Kitchen opening.** Equipment on, temperatures logged, prep list issued (BOH-01).
- 10:30 — FOH opening.** Cleaning check, table set-up, POS and card terminals tested (FOH-01).
- 11:30 — Pre-shift briefing (10 minutes).** Specials, 86'd items, reservations, VIPs, allergies, targets.
- 12:00–15:30 — Lunch service.** Temperature checks on hot and cold holding every 2 hours.
- 15:30 — Mid-shift reset.** Cash drop, restock, kitchen clean-down, staff meal.

7. **16:00 — Dinner prep.** Prep list review; second receiving for fresh fish and bread if scheduled.
8. **18:30 — Dinner briefing.**
9. **19:00–23:00 — Dinner service.** Manager on the floor; table touches every 15 minutes.
10. **23:00 — Last order** (or as per the police / excise licence for the area).
11. **23:30 — Closing.** Kitchen deep clean-down, food labelled and stored, Z-report, cash count, liquor lock-up (FOH-10, BOH-09).
12. **00:00 — Lock-up.** Gas valves off, exhaust off, alarm set, CCTV checked, keys logged.

Front of House (FOH)

The dining room's job is to seat a guest within 2 minutes, take an allergy-safe order and present a correct, voluntary-service-charge bill only when asked.

FOH-01 Opening checklist. Floor and washrooms clean; tables level and set to the plan; menus clean and current with FSSAI licence number; condiments within date; lights, music (licensed) and AC at set levels; POS, printers, card machines and UPI QR tested; float counted and signed.

FOH-02 Reservations and waitlist.

1. Take name, phone, covers, time, occasion, seating preference, allergies.
2. Confirm by SMS or WhatsApp only with the guest's consent; remind 3 hours before.
3. Hold a table 15 minutes past the booked time, then release after a courtesy call.
4. Waitlist: give an honest wait time and message when ready.

FOH-03 Welcome and seating. Greet within 30 seconds at the door; seat within 2 minutes; pull chairs, offer high chairs or wheelchair access; hand open menus; introduce the server by name.

FOH-04 Order taking.

1. Water offered within 2 minutes; free filtered drinking water is always available on request.
2. Ask about allergies and dietary preferences (veg, Jain, vegan, gluten-free) before recommending.
3. Explain specials with price.
4. Punch the KOT immediately; mark allergy orders "ALLERGY" and tell the kitchen pass in person.
5. Repeat the order back.

FOH-05 Service sequence and timing.

Step	Target
Drinks served	≤ 5 minutes from order
Starters	≤ 12 minutes
Mains	≤ 20 minutes from order (casual), paced by guest (fine dining)
Check-back	Within 2 minutes of each course
Clear	When everyone at the table has finished
Dessert / coffee offered	Every table

FOH-06 Table maintenance. Touch every table at least every 15 minutes; replace dropped cutlery within 1 minute; top up water; crumb down before dessert.

FOH-07 Billing.

1. Present the bill on request.
2. Bill shows GSTIN, 5% GST split (CGST + SGST), FSSAI number, item-wise prices matching the menu.
3. Service contribution, if the restaurant offers one, appears as optional and unfilled; staff explain it is voluntary when asked; it is never taxed.
4. Accept card, UPI, cash; never take a card out of the guest's sight.
5. Voids and discounts need the shift manager's POS PIN with a reason.

FOH-08 Complaints and service recovery. Listen, apologise, fix; shift manager attends any complaint within 2 minutes of being called. Server can replace a dish; captain can waive one item; manager can waive the table's food bill. Log every complaint.

FOH-09 Guests with special needs. Wheelchair route kept clear; menus in large print on request; staff trained in basic sign language greetings where possible; service animals allowed.

FOH-10 Closing. Close checks; Z-report; cash and card reconciliation; sanitise tables and chairs; restock stations; switch off non-essential equipment; complete the closing checklist.

Kitchen (BOH)

The kitchen runs to FSSAI Schedule 4: medically fit food handlers, a FoSTaC-certified supervisor on every shift, and temperatures logged at each critical point.

Control point	Critical limit
Chilled storage	≤ 5 °C
Frozen storage	≤ -18 °C
Core cooking (poultry, minced meat, reheat)	≥ 75 °C
Hot holding	≥ 63 °C
Cooling	60 °C to 21 °C in 2 hours, to 5 °C in 4 more hours
Danger zone	Discard after 4 hours cumulative between 5 °C and 63 °C

BOH-01 Kitchen opening. Gas and exhaust on in the right order (exhaust first); check fridge and freezer temperatures and log; check overnight storage labels; issue the prep list from par levels and reservations.

BOH-02 Receiving. Check vehicle hygiene, packaging, FSSAI label and expiry; probe chilled and frozen goods; weigh against the PO; reject non-conforming goods on the GRN; store cold goods within 15 minutes.

BOH-03 Storage and labelling. FEFO; label every prepped or opened item (name, date, time, use-by, initials); raw below cooked; veg and non-veg separated; nothing on the floor; dry store below 25 °C.

BOH-04 Personal hygiene. Annual medical fitness certificate; clean uniform, cap or hairnet, no jewellery, short nails; handwash 20 seconds at every change of task; gloves changed between tasks; sick staff sent home and logged.

BOH-05 Prep and cross-contamination. Colour-coded boards and knives; produce washed in potable water then sanitised; thaw in the chiller; separate fryer oil for veg and non-veg if the menu promises it.

BOH-06 Allergen control. Allergen matrix for every dish, covering the FSSAI-listed allergens (gluten cereals, crustaceans, milk, eggs, fish, peanuts, tree nuts, soy, sulphites); one cook and clean tools per allergy ticket; plate separately; the chef confirms at the pass.

BOH-07 Line service. Expeditor at the pass calls tickets, checks plate against recipe photo, temperature and garnish; target ticket times set per menu section; quality check of every plate.

BOH-08 Recipes and costing. Standard recipe card for each dish with yield, portion, method, photo, allergens and cost; recost monthly or when an ingredient moves more than 10%; target food cost set per menu (typically 28–35% of food sales).

BOH-09 Closing and cleaning. Label and store leftovers or discard by rule; clean all surfaces, equipment and floors; degrease hoods weekly; duct cleaning every 6 months; gas valves off; final temperature log.

BOH-10 Used oil and waste. Check frying oil with a TPC tester; discard at 25% TPC; sell only to registered RUCO collectors; segregate wet and dry waste per municipal rules; grease trap cleaned weekly.

BOH-11 Water and ice. Test potable water at an NABL lab every 6 months; clean the ice machine weekly; use scoops.

BOH-12 Kitchen safety. Wet-chemical (Class K) extinguisher at the line; hood suppression serviced every 6 months; gas leak detector tested monthly; first-aid kit with burn gel; knife and slicer training on file.

Takeaway and delivery (DL)

Delivery orders get the same allergen and temperature controls as dine-in, plus tamper-evident packing, and the restaurant's online menu must match its in-house menu on price, allergens and veg marking.

DL-01 Aggregator menu management. One master menu in the POS pushed to all aggregators; photos, descriptions, veg/non-veg mark, allergens and serving size kept current; price changes approved by RMGR; listings reviewed every Monday.

DL-02 Order acceptance. Accept within 60 seconds; check items available; if not, call or message the customer through the platform before cancelling; never accept an order the kitchen cannot deliver on time.

DL-03 Packing. Food-grade packaging (no recycled newspaper; no black plastic for hot food); hot items packed hot, cold items separately; sauces sealed; tamper-evident seal or sticker; label with order number and allergy flag; packing checklist ticked.

DL-04 Handover to rider. Rider waits in the designated area, not the kitchen; match order ID; hand over in an insulated bag; log handover time.

DL-05 Takeaway. No service charge on takeaway orders (CCPA guidelines); packaging charges shown separately and only as allowed by law; bill shows GST at 5%.

DL-06 Ratings and complaints. Check ratings daily; reply to complaints within 24 hours; refunds handled through the platform's process; recurring issues reviewed weekly.

DL-07 Reconciliation. Weekly payout reconciliation: orders, commission, GST collected by the platform (aggregators pay GST on restaurant services under section 9(5)), TCS/TDS, deductions; dispute errors within the platform's window.

Purchasing, stores and food cost (PS)

Food cost is controlled by four numbers checked weekly: purchases, opening and closing stock, wastage, and theoretical versus actual consumption.

PS-01 Vendor selection. FSSAI-licensed vendors only; GSTIN and bank details verified; sample and kitchen trial before approval; at least two vendors per key category; annual vendor review.

PS-02 Ordering. Daily perishables ordered by the sous chef from par levels by 16:00 for next-morning delivery; weekly dry goods by the storekeeper; all orders on a PO in the system.

PS-03 Receiving. See BOH-02; storekeeper signs the GRN; invoices matched to GRN before payment.

PS-04 Issues. Kitchen and bar draw stock against a signed requisition; no self-service from the store.

PS-05 Wastage log. Every discard (spoilage, prep trim beyond yield, returned dish, staff error) logged with weight and reason; reviewed weekly by HC.

PS-06 Stock count. Weekly count of high-value items (meat, seafood, cheese, liquor); full monthly count with the accountant; variance over 2% investigated.

PS-07 Food cost report. Actual food cost % = (opening stock + purchases – closing stock – staff meals) ÷ food sales; compare to theoretical cost from recipe cards and POS mix; menu engineering review every quarter (stars, plough-horses, puzzles, dogs).

Cleaning, pest control and facilities (FA)

A written cleaning schedule, a licensed pest-control contract and a monthly equipment check keep the restaurant inspection-ready on any day.

FA-01 Cleaning schedule.

Frequency	Area / item
After each use	Boards, knives, slicers, work surfaces, tables, menus
Every 30 minutes in service	Guest washrooms (signed log)
Daily	Floors, drains, bins, fridges (outside), ranges, fryers, dish machine, POS screens
Weekly	Fridge interiors, hood filters, ice machine, high-touch walls, grease trap
Monthly	Cold room, dry store shelving, light fittings, behind equipment
Every 6 months	Exhaust ducts (professional), water tanks

FA-02 Chemicals. Supplier-approved, labelled; Safety Data Sheets on file; food-contact sanitiser used at the stated dilution and contact time; stored away from food.

FA-03 Pest control. Licensed contractor, monthly service plus call-outs; bait-station map; fly-catchers away from food prep; door strips and screens intact; sightings reported to HC immediately; service reports filed.

FA-04 Equipment maintenance. AMC for refrigeration, dish machine, AC and exhaust; daily fault log; refrigeration failure → move food to working unit, log the temperature and time, discard if limits were breached.

FA-05 Fire safety. Extinguishers (ABC + Class K) inspected monthly and refilled on schedule; exits unlocked and clear during trading; emergency lights tested monthly; staff fire drill every 6 months.

FA-06 Gas safety. LPG or PNG installation by an authorised agency; cylinders stored outside the kitchen in a ventilated cage where LPG is used; leak test with soap solution, never flame.

Cash, billing and accounts (AC)

Every rupee is traced from POS to bank within 24 hours, and the GST return is filed from the POS sales report, not from estimates.

AC-01 Float and drawer. Fixed float per drawer, counted and signed at shift start and end; one cashier per drawer; blind count at close (cashier counts before seeing the system figure).

AC-02 Day-end. Z-report; cash, card and UPI totals matched to the POS; aggregator orders matched to platform dashboards; variance over ₹200 explained in writing; cash deposited next banking day.

AC-03 Voids, discounts, complimentaries. Manager PIN plus reason code; daily exception report reviewed by RMGR; staff meals recorded at cost.

AC-04 Payables. Vendor invoices matched to PO and GRN; payment run weekly; MSME vendors paid within 45 days.

AC-05 Statutory. GST returns monthly or quarterly per registration; TDS on rent and contractors; EPF, ESI and professional tax deposits on due dates; FSSAI annual return (if the licence category requires it) by 31 May.

AC-06 Monthly P&L. Sales by stream (dine-in, takeaway, delivery, beverages), prime cost (food + beverage + labour; target under 60–65% of sales), rent, utilities, marketing, aggregator commission; reviewed by the owner by the 10th.

People: hiring, training and rosters (HR)

Every new hire is medically fit for food work, trained on the SOPs for their role within 14 days, and paid at least the state minimum wage on time.

HR-01 Hiring. Job description and pay band approved by the owner; trial shift for skilled roles; ID and address verification; police verification where local rules or the owner require; medical fitness for all food handlers; written appointment letter per the Labour Codes; no workers under 18 in kitchens or bars.

HR-02 Induction (days 1–3). House rules, grooming, hygiene, allergen basics, fire safety and extinguisher use, POSH policy, cash rules, service charge rules, SOP checklist for the role; buddy for 2 weeks; sign-off by the department head.

HR-03 Training. Monthly 30-minute refreshers (food safety, upselling, wine or menu knowledge); FoSTaC certification for at least one supervisor per 25 food handlers; training log per person.

HR-04 Rosters. Published 7 days ahead; daily and weekly working hours, weekly rest and overtime per the OSH Code and state rules; split shifts only within the permitted spread-over; transport and consent for women on late shifts.

HR-05 Pay and tips. Salary by the statutory date with payslips; EPF and ESI where applicable; any voluntary service contribution or tip pool distributed by a written formula shared with staff.

HR-06 Conduct and POSH. Code of conduct signed at joining; progressive discipline with written records; an Internal Committee if 10 or more employees, otherwise complaints go to the district Local Committee.

HR-07 Exit. Handover, uniform and key return, full and final settlement within the Code on Wages time limit.

Marketing, reservations and online reputation (MK)

The restaurant markets only what it can deliver, replies to every review, and contacts guests only with their consent.

MK-01 Listings. Google Business Profile, reservation platforms and aggregator pages carry the same hours, menu, prices, photos and phone number; checked monthly and on every change.

MK-02 Social media. Content calendar a month ahead; real photos of real dishes; paid partnerships with creators disclosed per ASCI guidelines; no health claims about food unless provable.

MK-03 Reviews. Read daily; reply to negative reviews within 24 hours with an apology and an offline contact; never buy, incentivise or fake reviews (CCPA and the BIS standard on online reviews).

MK-04 Guest data and consent. Collect phone and email only with a clear purpose; separate opt-in for offers; honour opt-out within 48 hours; SMS through TRAI DLT-registered templates; delete data no longer needed.

MK-05 Promotions. Written terms (validity, exclusions, one per table); POS discount codes set up before launch; results reviewed after each campaign.

Emergencies and incidents (EM)

The shift manager leads every emergency until the owner or the authorities arrive, and every incident is written up the same day.

Code	Situation	First actions
EM-01	Kitchen fire	Shut gas at the main valve; use hood suppression or Class K extinguisher, never water on oil; evacuate guests; call 101 / 112
EM-02	Gas leak	No switches or flames; shut gas; open doors and windows; evacuate; call the gas agency and fire brigade
EM-03	Guest choking or collapse	Trained staff give first aid (back blows / abdominal thrusts, CPR); call 108 / 112; keep the area clear; note times
EM-04	Allergic reaction	Call 108 / 112 immediately; help the guest use their own adrenaline auto-injector if they carry one; keep the dish and ticket for investigation
EM-05	Suspected food poisoning	Record symptoms, dishes and times; retain samples; inform HC and owner; inform the Food Safety Officer if several guests are affected
EM-06	Power failure	Generator or inverter on; check fridges and log temperatures; candles only in safe holders; settle bills manually if POS is down
EM-07	Violent or intoxicated guest	Stay calm; do not touch; separate from others; call the police (112) if threatened; review CCTV and log
EM-08	Injury to staff	First aid; hospital if needed; ESI or insurance claim; incident report; fix the cause

Code	Situation	First actions
EM-09	Inspection by an authority	Welcome the officer; ask for ID; call the manager and FSS; give records requested; sign the report only after reading; send a copy to the owner
